

## Mr Pieter Oosthuizen - CV

Cargill Animal Nutrition

Technical Application Specialist, Ruminant

- Pieter obtained his BSc Agric degree from the University of Pretoria in South Africa, followed by his BSc Honour's Degree in Animal Nutrition (specialising in ruminant nutrition) at the University of Stellenbosch.
- He started his career in technical sales in the South African feed industry and quickly progressed to ruminant nutritionist. In 2005 he commenced work on a special direct fed microbial project, which later resulted in the development of ground breaking technology for the prevention of acidosis in ruminants consuming rations high in starch.
- For a short while he also worked in the animal health industry taking care of a portfolio of endoparasite products, but returned to his passion of ruminant nutrition when he joined Cargill in 2015.
- As Technical Application Specialist, Ruminants, Pieter is responsible for rolling out new Cargill technology, supporting customers through the use of Cargill's technologies and products, as well as supporting the commercial teams with technical support.
